## WH70 WELDING HELMET WITH GRAND GDS

The lightweight WH70 helmet offers an aerodynamic shell designed for better fume deflection and a smooth rounded perimeter for increased comfort. Protection lenses and ADFs are easily removed for replacement or cleaning. Curved front cover lens reduces heat and spatter build-up, light reflections and fogging. WH70 welding helmets are offered with Grand ADC Plus variations that offer the highest Optical Classification **1/1/1/1** and excellent switching speed of 0.15 ms (at room temperature).

Ultimate comfort, patented headgear

**adcplus**  
ANGULAR DEPENDENCE COMPENSATION

## WH70 WELDING HELMET

### J9916

*With Grand GDS + Grind Function*

#### FEATURES

- **1/1/1/1 OPTICAL CLASS**
- Extra-large 96 x 68.5mm viewing area. 110 x 110mm cartridge size
- Enhanced visibility and true colour recognition
- External controls that allow easy access for widest shade selection (6-13), grind/weld mode, sensitivity and delay adjustment
- Suitable for grinding – all components are B-rated for impact resistance

#### J9927 GRAND GDS CARTRIDGE

Viewing Area	98 x 68.5mm
Open State Shade	4
Closed State Shade	6-8 / 9-13
Shade Adjustment	Yes / External
Sensitivity Adjustment	Yes / External
Delay Adjustment	Yes / External
Grinding Mode	Yes / External
Switching Time at 23°C	0.15ms
Clearing Time	0.1-1.0s
UV / IR Protection	UV 16 / IR16
Temperature Range	-10°C / +60°C
TIG Detection	Enhanced
Energy Supply	Solar Cells / No Battery Change
